FLAT ORBITAL GRINDING MACHINE MPO/600

The MPO/600 grinder is suitable to grind the flat surface pieces having dimensions not bigger than 200 mm. Due to its particular structure, it is possible grinding cylindrical pieces having always maximum length 200 mm.

The advantages that this machine can give are, above all, its simplicity and its cost compared to the traditional flat grinding machine. Besides the belt hasn't the joint and it is very easy and quickly to change.

The machine is made up by an aluminum disk assembled directly on the spindle of the electrical motor. On the aluminium diam. 600 there is pasted a Velcro disk that it is used to keep the abrasive disk as on the back part it has the material suitable to be captured by the Velcro disk.

Technical Specifications:

Motor KW4 – 1400 rpm – variable rpm 0 – 1600 – belts diam. 600 - work-top height 1050 mm
